ABOUT THE COMPANY

At **Vivre Panels**, design shapes the way a space feels, functions and ultimately endures.

Our work is rooted in a commitment to materials that bring clarity, depth and intention to contemporary interiors. From **Wall Panels and Exterior Claddings to Acrylic Sheets and Laminates**, every Vivre material is crafted with the same quiet rigour—considered in its Design, exacting in its Engineering and created to stand with grace over time. This approach has earned the trust of architects, designers and creators who look to Vivre for surfaces that elevate projects with consistency, authenticity and an unmistakable sense of craft.

Acrypedia is shaped from this very philosophy. It unites two of our most defining surface originals – **the Luminous Gloss of Acryvibe** and the **Metal Matt, Gloss and Matt Composure of Vivasaa** – into one cohesive design language. Borrowing clarity and visual expansion from Acryvibe and Warmth, Subtlety, and Tactile Depth from Vivasaa.

Acrypedia brings these strengths together, balancing Gloss and Matte, Acrylic and Polymer, Expression and Calm. The result is therefore a hybrid surface collection designed for wardrobes, walls, furniture, and crafted interiors that seek both presence and refinement.

Each sheet carries the precision, finish and enduring character that define our work at Vivre.

Acrypedia is where two materials meet to create a more thoughtful future for surface design – **Quiet, Confident and Unmistakably Vivre.**

From the house of Vivre, for **CREATORS WHO BUILD WITH VISION.**

A modern kitchen featuring a combination of light beige and dark brown Luster Pearl finish cabinets. The upper cabinets are dark brown, while the lower cabinets and a central island are light beige. Integrated into the dark brown upper cabinets are a built-in oven and a built-in coffee machine. The kitchen has a dark grey countertop and a dark grey tiled floor. A semi-transparent dark grey rectangular box with the text "LUSTER PEARL" is centered over the image.

A modern kitchen interior featuring glossy, light-colored upper cabinets that reflect the surrounding environment. Below the cabinets is a dark, veined marble backsplash. A black range hood is mounted above a stainless steel oven with a digital display and control knobs. In the foreground, a kitchen island with a grey countertop and a white, vertically-ribbed base is visible. A black pendant lamp with a gold rim hangs from the ceiling. A small potted plant sits on the island. The floor is made of dark wood planks.

A modern kitchen featuring dark grey, flat-panel cabinets with thin vertical silver handles. The countertop is a light-colored, veined marble. A stainless steel sink is integrated into the countertop, with a modern, curved, pull-down faucet. A semi-circular stainless steel range hood is mounted above the countertop. A central text box with a metallic texture contains the words 'METAL MATT' in a bold, serif font.

Laminate sanding on the back side for better bonding

Product Characteristics

· HIGH THERMAL STABILITY
VIV/ASAA LAMINATE is superior to other highly durable products when heat tested.

· SCATCH RESISTANT
VIV/ASAA LAMINATE has strong scratch resistant compared to other resins so it has strong surface hardness

OUTSTANDING WEATHER PROOF DURABILITY

VIV/ASAA LAMINATE has outstanding weather-proof durability than other resins

VIV/ASAA sheet : Height **8 Ft** x Width **4 Ft** x Thickness **1 mm** (+- 8%)

*There can be some color variations in material from different batches. We always recommend using same batch material to avoid color variation

Disclaimer

Experience unparalleled quality assurance with our rigorously tested products, engineered to meet manufacturing specifications with optimal precision. We suggest all our customers to inspect before installation. Please note, that our warranty is exclusive and does not extend to defects or non-compliance resulting from external factors, safeguarding your satisfaction. Few points to keep in mind:

Wrong handling/transportation/storage of acryvibe.
Inaccurate installation of acryvibe.
Inappropriate usage of acryvibe.
Negligence in the maintenance of the product.
Exposing the products to high-temperature.
Unauthorized alteration of acryvibe.
Using the product for outdoor applications.
Using plywood with high moisture content is a strict NO.
Never use sheets on uneven surfaces.
Always adhere to using high-quality adhesive.
Apply an adequate amount of pressure.
Do not paste sheets on the branding area of laminates.

Note that there won't be any guarantee or exchange under any situation.

There can be colour variations in the products among the different batches.

We always advise using products from the same batch to Keep away colour variations.

This brochure stands for the purpose of presentation. The Actual color of the laminates can differ to some extent.

Top 6 reasons behind formation of air bubble on acrylic laminate sheets!

When acrylic sheets are bonded in high humid conditions.
Uneven substrate surfaces leading to debonding in specific areas.
Using water base synthetic resin adhesive in place of PEVA (polyethylene vinyl acetate co-polymer).
Lock of sufficient pressing during the period of bonding of the sheets.
Loss of moisture from the substrate post-installation.

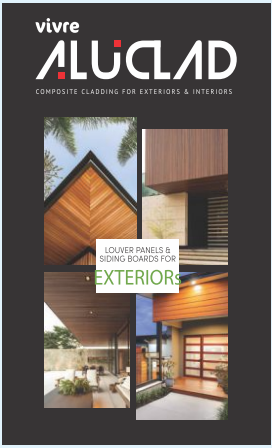

Usage of unnecessarily large acrylic/pvc panels (x 8ft x 2ft long)

ACRYVIBE sheet : Height 8 Ft x Width 4 Ft x Thickness 1.5 & 2 mm (+- 8%)

*There can be some color variations in material from different batches. We always recommend using same batch material to avoid color variation
